

KISHOR GOGOI

QA Engineer

+91-6001041752 | kishorgogoi403@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

QA Engineer with hands-on experience in manual and automation testing using Selenium, Appium, and REST Assured. Skilled in SDLC/STLC, test case design, defect life cycle management using Jira, SQL validation, and API testing with Postman.

Drawn to catching issues before they reach users and building tools that make testing faster, reflected in Testnexus AI, a self-built AI-powered test case generator live in production. Experienced in building data-driven automation frameworks with Page Object Model (POM) and integrating CI/CD pipelines to deliver stable, high-quality releases across web and mobile platforms.

Skills

Languages & Querying: Java, SQL

Automation Tools & Frameworks: Selenium WebDriver, Appium, TestNG, JUnit, REST Assured, Postman

Testing Skills & Methodologies: Manual Testing, Agile (Scrum), SDLC, STLC, API Testing and Automation, Mobile Testing, Test Case Design, Bug Tracking and Debugging, Defect Life Cycle, Regression Testing

Developer Tools: Git, GitHub, Jira, TestRail, Jenkins, GitHub Actions, GitHub Copilot

Design Patterns: Page Object Model (POM), Data-Driven Testing, CI/CD Integration

Soft Skills: Communication, Teamwork and Collaboration

Experience

Software Testing Intern / Prodigy InfoTech

May 2026 – July 2026

- Designed and executed 40+ test cases covering functional, regression, and edge-case scenarios across assigned software modules.
- Developed 8+ Selenium-based automation scripts, cutting manual regression testing time by over 50%.
- Logged, tracked, and verified 15+ defects to support timely resolution and improve release quality.
- Documented compatibility results across 3 browsers/devices and organized test cases, automation suites, and reports for GitHub delivery.

Projects

Testnexus AI / React, Node.js, MongoDB, Gemini API

2026 – Present

- Built an AI-powered test case generator using React, Node.js, MongoDB, and the Google Gemini API, cutting test case creation time by 90% compared to writing test cases manually.
- Added export support for TestRail, Jira Zephyr Scale, and Azure DevOps, so generated test cases can be used directly in existing test management tools.
- Designed, developed, and deployed the full application independently, live at testnexus-ai.vercel.app.

Mobile App Testing – Weather App / Appium, Java, TestNG

April 2026 – May 2026

- Wrote and executed 15+ automated test scripts for a Weather Forecast Android application using Appium, Java, and TestNG.
- Used Page Object Model (POM) to separate screen logic from test scripts, making the test suite easier to maintain and update.
- Tested the application on Android emulators and physical devices using ADB to check device compatibility.
- Added automatic screenshot capture on test failure to make debugging faster.

Web Automation Framework / Selenium WebDriver, Java, TestNG, POM

January 2026 – February 2026

- Built a web automation framework with 15+ test scripts using Selenium WebDriver, Java, and TestNG based on Page Object Model (POM).
- Set up data-driven testing with configurable environment variables to run the same tests across multiple datasets.
- Validated CRUD operations through schema checks, response code validation, and payload assertions.
- Covered 95% of functional test scenarios and connected the framework to GitHub Actions for automatic test runs on every code push.

Education

B.Tech Computer Science & Engineering

2022 – 2026

Lovely Professional University

Jalandhar, Punjab

Senior Secondary (Class 12) – Science

2021 – 2022

Resolution Academy

Dhemaji, Assam

Certifications

- SAP Certified Project Manager – SAP Activate & Agile Implementation, SAP (2026)
- Software Testing and Automation Specialization, Coursera (2025)
- Oracle Cloud Infrastructure 2025 Certified DevOps Professional, Oracle (2025)
- Web and Mobile Testing with Selenium, Coursera (2025)
