

KISHOR GOGOI

SDET (Software Development Engineer in Test)

+91-6001041752 | kishorgogoi403@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

SDET with hands-on experience building test automation frameworks using Selenium WebDriver, Java, TestNG, and REST Assured. Skilled in Page Object Model (POM) design, data-driven testing, API automation, and CI/CD pipeline integration using GitHub Actions and Jenkins. Experienced in writing clean, maintainable test code and applying SDLC/STLC practices to deliver stable releases. Built and deployed Testnexa AI, a self-built AI-powered test case generator, demonstrating full-stack development skills applied directly to test engineering problems.

Skills

Languages & Querying: Java, SQL

Automation Tools & Frameworks: Selenium WebDriver, Appium, TestNG, JUnit, REST Assured, Postman

Testing Skills & Methodologies: Manual Testing, Agile (Scrum), SDLC, STLC, API Testing and Automation, Mobile Testing, Test Case Design, Bug Tracking and Debugging, Defect Life Cycle, Regression Testing

Developer Tools: Git, GitHub, Jira, TestRail, Jenkins, GitHub Actions, GitHub Copilot

Design Patterns: Page Object Model (POM), Data-Driven Testing, CI/CD Integration

Soft Skills: Communication, Teamwork and Collaboration

Experience

Software Testing Intern / Prodigy InfoTech

May 2026 – July 2026

- Designed and executed 40+ test cases covering functional, regression, and edge-case scenarios across assigned software modules.
- Developed 8+ Selenium-based automation scripts, cutting manual regression testing time by over 50%.
- Logged, tracked, and verified 15+ defects to support timely resolution and improve release quality.
- Documented compatibility results across 3 browsers/devices and organized test cases, automation suites, and reports for GitHub delivery.

Projects

Testnexa AI / React, Node.js, MongoDB, Gemini API

2026 – Present

- Built an AI-powered test case generator using React, Node.js, MongoDB, and the Google Gemini API, cutting test case creation time by 90% compared to writing test cases manually.
- Added export support for TestRail, Jira Zephyr Scale, and Azure DevOps, so generated test cases can be used directly in existing test management tools.
- Designed, developed, and deployed the full application independently, live at testnexa-ai.vercel.app.

Mobile App Testing – Weather App / Appium, Java, TestNG

April 2026 – May 2026

- Wrote and executed 15+ automated test scripts for a Weather Forecast Android application using Appium, Java, and TestNG.
- Used Page Object Model (POM) to separate screen logic from test scripts, making the test suite easier to maintain and update.
- Tested the application on Android emulators and physical devices using ADB to check device compatibility.
- Added automatic screenshot capture on test failure to make debugging faster.

Web Automation Framework / Selenium WebDriver, Java, TestNG, POM

January 2026 – February 2026

- Built a web automation framework with 15+ test scripts using Selenium WebDriver, Java, and TestNG based on Page Object Model (POM).
- Set up data-driven testing with configurable environment variables to run the same tests across multiple datasets.
- Validated CRUD operations through schema checks, response code validation, and payload assertions.
- Covered 95% of functional test scenarios and connected the framework to GitHub Actions for automatic test runs on every code push.

Education

B.Tech Computer Science & Engineering

2022 – 2026

Lovely Professional University

Jalandhar, Punjab

Senior Secondary (Class 12) – Science

2021 – 2022

Resolution Academy

Dhemaji, Assam

Certifications

- SAP Certified Project Manager – SAP Activate & Agile Implementation, SAP (2026)
- Software Testing and Automation Specialization, Coursera (2025)
- Oracle Cloud Infrastructure 2025 Certified DevOps Professional, Oracle (2025)
- Web and Mobile Testing with Selenium, Coursera (2025)
